Technical drawing

Iconography legend

- PE
- 30°/40°C [32°/104°F]
- Closed
- 4-ways
- Rims for boxes
- Reinforced

Recommendations for use

- ✓ Do not stack more than 48 pallets, which is equivalent to a height of 7.7 m when empty
- ✓ Do not handle stacks of more than 27 empty pallets.
- ✓ Once stacked in height check that they are properly fitted.

*1 The values indicated are approximate and are based on both practical experiences and ISO 8611 tests with a uniformly distributed standard load, distributed all over the pallet surface, duly consolidated, compact and stable and at ambient temperature (20°C [68°F]) for a specific time. Different load conditions produce different values that have to be checked at the customer's request. Any deterioration or breakage in the pallet may vary these results.

*2 Due to the characteristics of the materials recycled, the dimensions and the weight of the pallets may present certain tolerances. Dimensional tolerances according to DIN ISO 2768-V and weight tolerances: +/- 4%. Except for references of the FLAT category: +/- 3%.
